

OneSeal 79-T06 - ANTI-SPIN - ISO 17712:2010 Compliant

High Security Container seal - with flexible pin and ANTI-SPIN feature

The patented flexible design provides a high degree of flexibility to fit on any container, truck or trailer door hasp. The patented anti-spin feature ensures that the pin with its 4 “fins” as part of the locking mechanism prevents friction attacks.

The pin

ONESEAL flexible type 79-T06 pin is made of metal. The pin of the seal has a Ø 5 mm soft wire embedded - making it flexible and resistible to any harsh tool. The pin is coated with plastic and marked with an “H” indicating High Security Seal. Standard colours are red, white, blue, green and yellow.

Marking

Company name can be engraved on the cylinder by use of high technology laser engraving that prevents tampering. All seals are engraved with a consecutive unique numbering. Bar coding can also be applied.

Packaging

For easy stock control and number verification the seals are delivered in two pieces – cylinders are packed on tape in consecutive order together with pins also on tape. For easy handling and distribution 100 seals are packed in inner boxes. Individual blister packing is also available. All boxes comes with barcodes for inventory control

ISO 17712:2010

The seal is in compliance with ISO 17712:2010 as a High Security Seal and is C-TPAT compliant. Seals can only be removed with bolt cutters of minimum 24”.
