

ONESEAL PT 1.5 CABLE SEALS (Variable length)

OneSeal PT 1.5

A pull to tighten cable seal with Ø1.5 mm wire

The ideal cable seal to apply on all awkward sealing points. Key applications are In-plant valves, tank-truck valves, truck trailers, rail wagons, box doors, hazardous material boxes, gates, scales, money bags, meters, barrels, airline carts etc.

The coated cable

Flexible galvanised high tensile strength aircraft control cable in steel – including steel core. A special developed plastic coating gives the Ø1.5 mm wire a square form and prevents unlocking by twisting the wire. The wire is marked in both ends for proof of tampering and easy identification. The wire is available in various lengths.

The body

The metal body features a non-flammable and shock proof PC plastic cover, protecting the engraving against tampering. Standard are red and white. Special colours are available for large orders.

Laser engraving

Your company logo will be engraved by use of high technology laser engraving, which prevents tampering. All seals are engraved with a consecutive unique numbering. Bar coding can also be applied.

Packaging

For easy stock control and number verification the seals come in two pieces - cylinders & cables. The cylinders are packed on tape in numerical order together with the cables. For easy handling and distribution 100 seals are packed in 1 inner box. 4 inner boxes are packed in 1 outer box.

Customs

Seals are approved by Customs authorities world wide including US Customs, HM Customs.

Type	Wire width	Wire length	Weight / pcs	Weight / crt
PT 1.5	1.5 mm	300 mm	0.020 kg	8.7 kg

➤ Packing: 400 pieces per carton (minimum delivery)

Security seals – a small important detail in shipping - provided by OneSeal an ISO 9001 certified company.
